WORLD THINK-ONOMIC FORUM

Welcome to WTF 2040 – “state-of-the-art thinking for deeper wider challenges”

W.T.F. 2040

Welcome - 欢迎 - buena sera -
आपका स्वागत है - добро
пожаловать - bienvenue

What
happened?
Is this a
dream??

Look,
there's two
of us,
Jo & Joe...

Sponsored
by G+

Where are
we? WTF**
is WTF??

How did
we jump
to 2040??

There's a huge
conference
centre, let's look
up...

..it says 'WTF'
is the **World
Think-onomic
Forum**

looks like
a military
fortress

I guess
security
is intense

And
WTF is
'G+'?

G+ is the global consortium
of **GAFA** (Google-Amazon-
Facebook-Apple), **GUN** (the
for-profit U.N), **GR8** etc...

Look, our
event is
already
on the
program!!

That's G+,
they know
what you
think before
you do

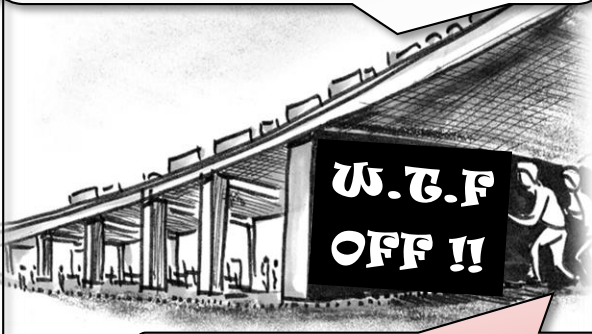

& what's
'thinko-
nomics'?

Seems 'economics' got
itself a bad name...
'think-onomics' tries to
look deeper & wider

Some say
it's the way
forward,
others say
it's snake oil

& many despise the **WTF** –
climate refugees, hacktivists &
cyberpunks, ravers & poets,
survivalists & just ordinary people

Yeah we're the 99.9%!!

Figure
11-2

W.T.F. OUTSIDE TRACK

The excluded and outsiders use different entrances with different agendas

W.T.F. TRADE ENTRANCE

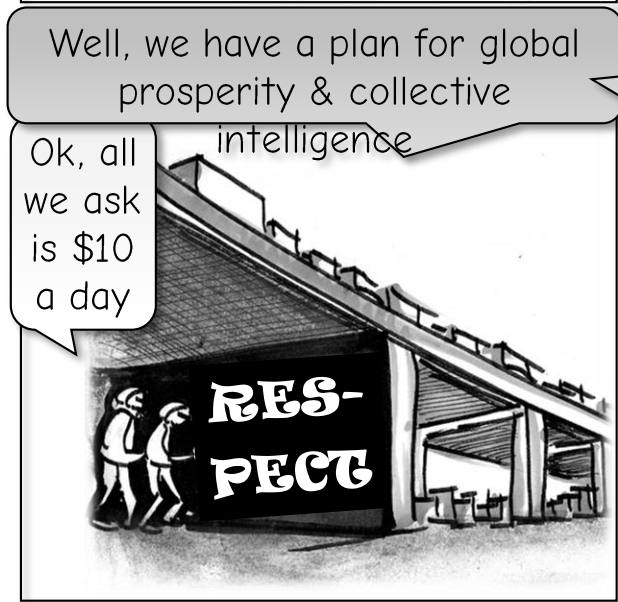

Figure
11-3

W.T.F. INSIDE TRACK

Games within games and players with unimaginable powers

W.T.F. G-CLUB HYPER ELITE ONLY

Lucky to get through security, only hyper elite are allowed

& what's '22236'?

That's geo-stationary orbit... as high as it gets

Wow!! WTF is that

that's a mock-up... They say the real ones in the labs have full deeper-mind intelligence

MEANWHILE

BTW ...heard of 'synergistics'? Worried???

Not at all... we control finance, food, tech, you name it... the show is ours to run

But what if we could use it to upgrade our business model??

Ok why don't you play along, get the source code, then turn 'em over

Hi, I'm Maria from G-FIN... I work on intelligent finance

Hi we're J&J of Deeper City ... would you like to try the Mind-Games?

LATER...

...they say a so-called 'Finance-III' could bring \$5 a day to 5 billion people

As long as they work for us, fine -so let's try this 'Mind-Game'

Figure
11-4

W.T.F. ELEVATOR PITCH

Chance sometimes overtakes years of careful planning

W.T.F. HYPER-VATOR ACCESS RESTRICTED

WOW – in the elevator with the CEO of G+,
the most powerful woman in the world !!

Hi – we are J&J from
Deeper City – we'd like
to introduce some ideas
of mutual interest...

It seems the challenges
of climate, cities,
poverty etc, need more
than policies or markets

It seems humanity has
reached the end of its
evolutionary stage.
Before we destroy
ourselves, now is the
time for co-evolution

Co-evolution is about
learning & thinking with
a *collective intelligence*
or 'deeper mind'

With a 'deeper city mind'
we can design cities, not
only as technically
'smart', but 'wiser'

With 'collective economic
intelligence', we can
move from 'winner takes
all' exploitation, towards
'winners are all'
livelihoods

So our project is
mapping the
pathways from
'smart to wise'...

...and we're running
some Mind-Games
here & it would be
great if G+ can join

Yeah, chance of a
lifetime – 15 second
pitch - don't blow it!!

Hmm

True

Could be

Really?

Maybe

Hmm

Ok here's my
card, contact my
private office

They will arrange
for you to visit the
G+ Mind-Labs

Figure
11-5

W.T.F. – DEEPER MIND LABS

A planet size Deeper Mind Lab has already been built by G+, but what is their agenda??

G+ LABS
ACCESS RESTRICTED

(Wow - Deeper-Mind-Labs - never thought they were real)

((I'm more worried that G+ steals the ideas of which you talk freely))

Hi, we are Jo & Joe of Deeper City

Hi I'm Natalya from G+

And welcome to the **Large Thinkonomic Synergizer** - 10 billion inter-connected spheres, a global Deeper-Mind-Lab for growing collective intelligence

Here's one at the late-evolution stage... you can see the elite extracting the value, leaving burnout & chaos

spheres within spheres, & smaller spheres inside'em, & so on ad infinitum?

Look they still need humans for repair & maintenance

Fantastic... so when do you go into commercial production?

Sorry I can't tell you that - the Large Thinkonomic Synergizer is the world's most advanced Deeper-Mind-Lab, we cannot imagine where it's going next

Amazing... And our Mind-Game workshop starts tomorrow if you can make it

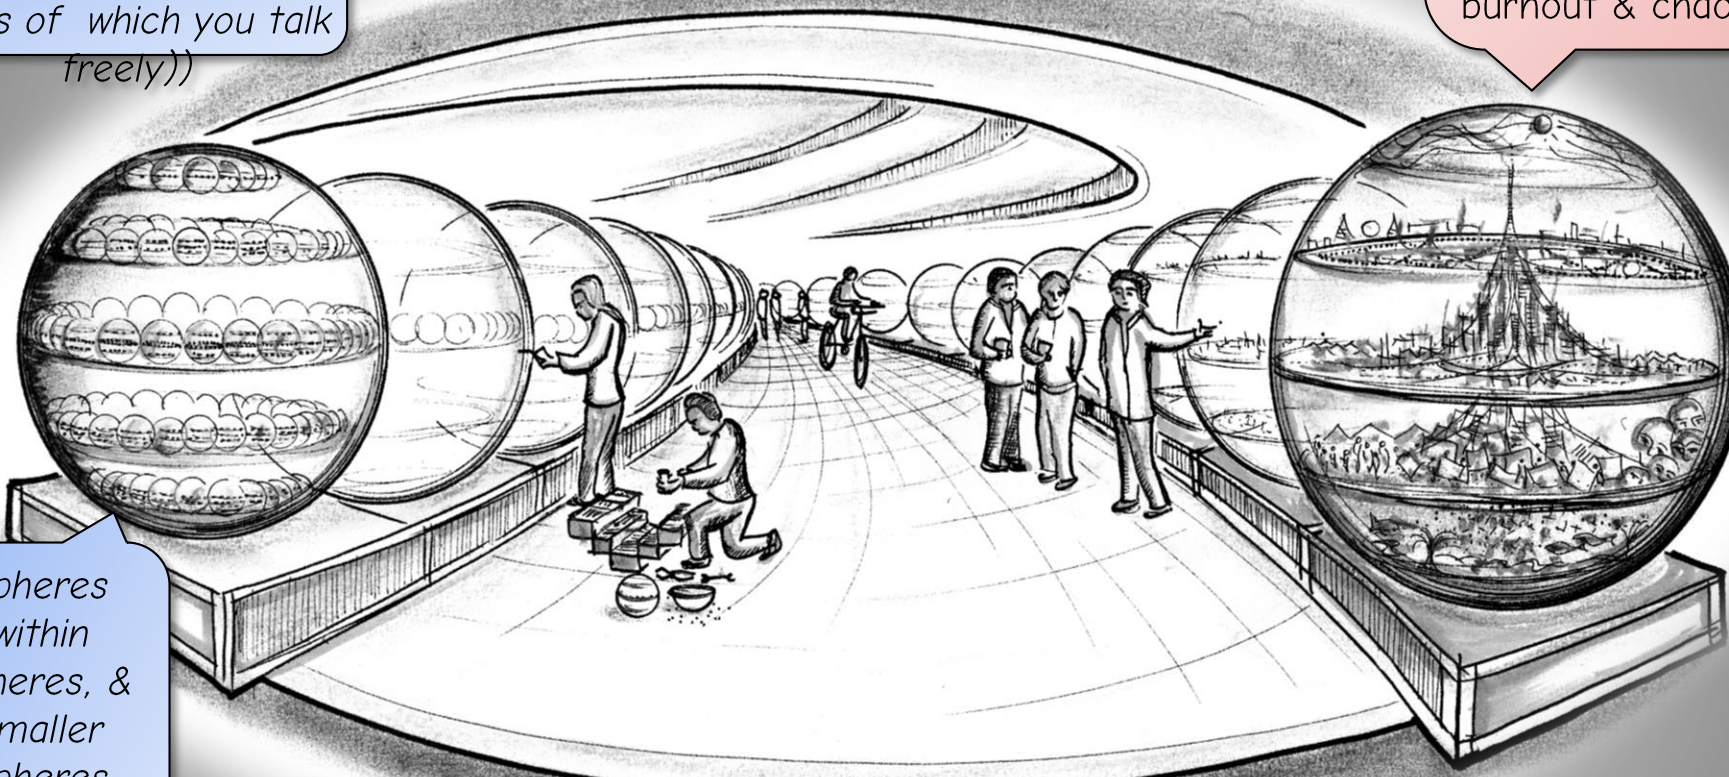

Figure
11-6

DEEPER GAMES

The Mind Game design is now taking shape and the players are here

Mind-games STRATEGY & TACTICS

So what d'you think? How do we do this Mind-Game thing??

And maybe risky...

it's a real-time demo of a Deeper-Mind-Lab... exciting

So far we have 5 domains—
Cities, Economies, Ecologies,
Technologies, Politicals

In each one there are
pathways from 'smart to
wise', towards a Deeper-Mind.

So each one is now a
'Mind-Game'... And what's
the aim of this game??

The aim of each Game
is co-evolution, from
competition to
collaboration. The
pathways are the guide

Ok I get it, but will
the players get it??

I think many
are on the
same page,
even hyper-
capitalists
are asking,
what next?

& who
are the 5
players
anyway?

They're all
serious
activists,
scientists,
politicians

& can they go
all the way from
competition to
collaboration in
one session?

I think it's
more of a
journey
towards 'here
be dragons'

Meaning,
the
dragons
within or all
around??

& this is just a
demo – the
real Mind-
Game has 7-
10 billion

GOOD MORNING

& welcome to the
Mind-Games. This
is Joe & I'm Jo of
Deeper City...

I'm
Rasheed,
builder of
SE Asia

Maria,
financier
from G-
FIN

Benito,
Brazilian
squatter
activist

Natalya,
chief
scientist
G+

Aisha,
Mayor
in
central
Africa

& who are
these people
over here??

Yes let's
introduce the
artist,
caterer, tech
& creche
manager

the aim of the Mind-
Games is 'GAME-
CHANGING' – from
smart competition to
wise collaboration.

Players play the Mind-
Game which they
know best - Cities,
Economies, Ecologies,
Technologies & Politics

Each Game starts with normal
competition & '**winner takes all**'.
Then we explore the pathways
towards collaboration &
'**winner are all**'

A real game
could take a
lifetime, so
here it's a
simulation

Any
ques-
tions?

So this
will be
good for
our
business
model??

Can we
play the
game for
equality &
justice??

Will it help
to avoid
eco-
catast-
rophe??

We think
so...
we can
try...

Figure
11-7

DEEPER DIVES

Firstly we explore the deeper dynamics of competition versus collaboration

Mind-Games KICKING-OFF

So here's the synergistic 'toolkit'... useful for Mind-Games

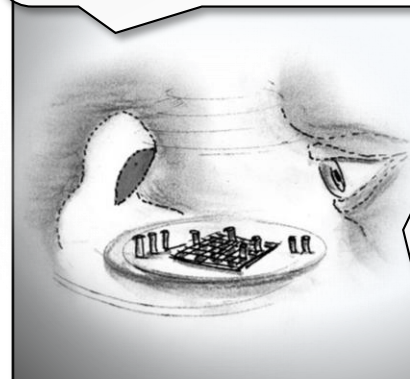

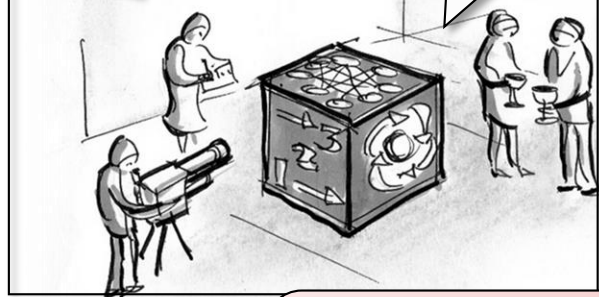

It looks **'wider, deeper, further'**

Everyone ok with what to do?

So my whole career I've been the smartest & the winner - now you want me to collaborate??

It's like 'Smart' is winning an argument with your partner - 'Wise' is knowing when not to argue

More urgent if we live together with 8-10 billion humans on 1 planet

For games like chess, there's rules & pieces on a board

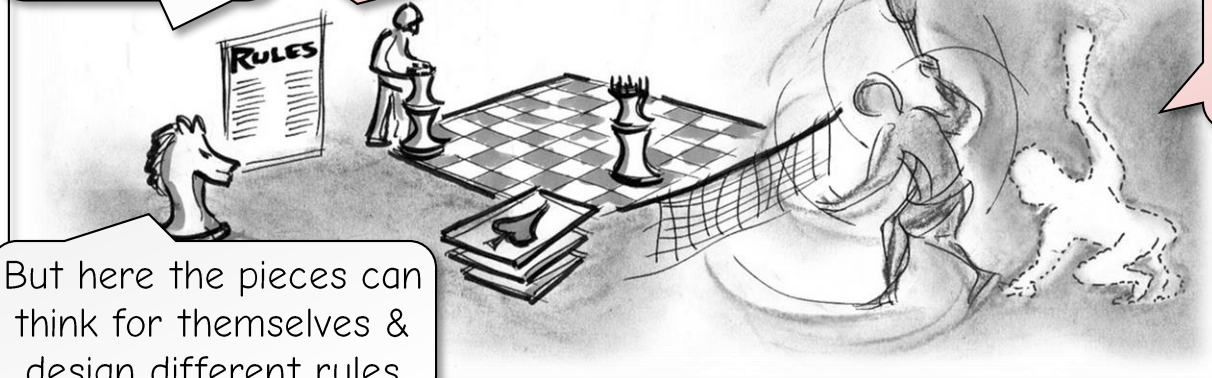

So you mean we start with the old game & end up playing a new one?

That's about it

Ok so why is competition more fun than collaboration?

Yeah when I play tennis I aim to win... 'co-tennis' doesn't really do it

Maybe there's a wild creature hiding in your shadow...

But here the pieces can think for themselves & design different rules

So let's talk about the game of **Monopoly** - with rapacious greed you make beggars of the others

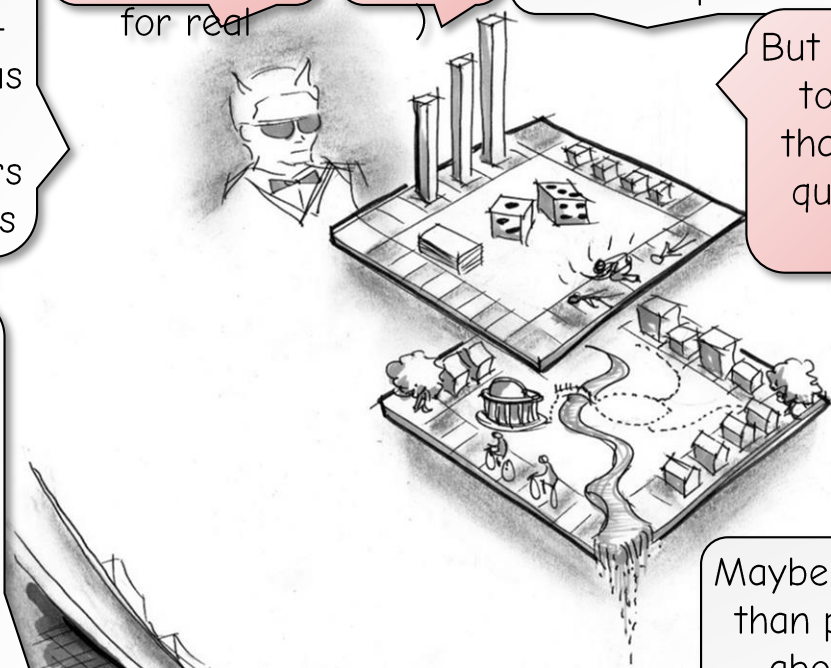

Yes it's a great game.. many play it for real

(tough on the beggars)

Now look below, there's a game of **Civil-opoly** - nice trees & parks & rivers...

But is it fun to play, that's the question ???

For that we talk to the outsiders & squatters under the flyover... new ideas from the edges of society

Maybe this game is more than parks & trees, it's about being human

(Rasheed here) - yes we can all build real estate & beat the competition

More rewarding to build a 'reality state'

So let's start the **Cities Game**

>>>

Crisis & opportunity all in one

& we are gonna say what we think.. & the elites are gonna listen

Maybe this game is not only possible but historically **inevitable**
