THE POWER GAME

This game calls for the deepest of all minds, to design the structure of society itself

Mind Games 'POLIT-OPOLY'

Greetings, I'm Aisha. My township was rough but there was hope on the streets

I got to be mayor, then went to the U.N.

We worked for positive change – instead we got terror & instability

We invited the global G-firms – it seemed anything was better than chaos & war

So we kept the symbols of democracy while real business shifted to elsewhere

So this Power Game is about 'power over' & how it shifts to 'empowerment with' & 'within'

LET'S MAKE US GREAT AGAIN'

'TRUST US & YOU WILL BE OK'

Politics starts as a ship of fools with puppets on strings

Some protest for alternatives – we can admire their principles – but they don't last long

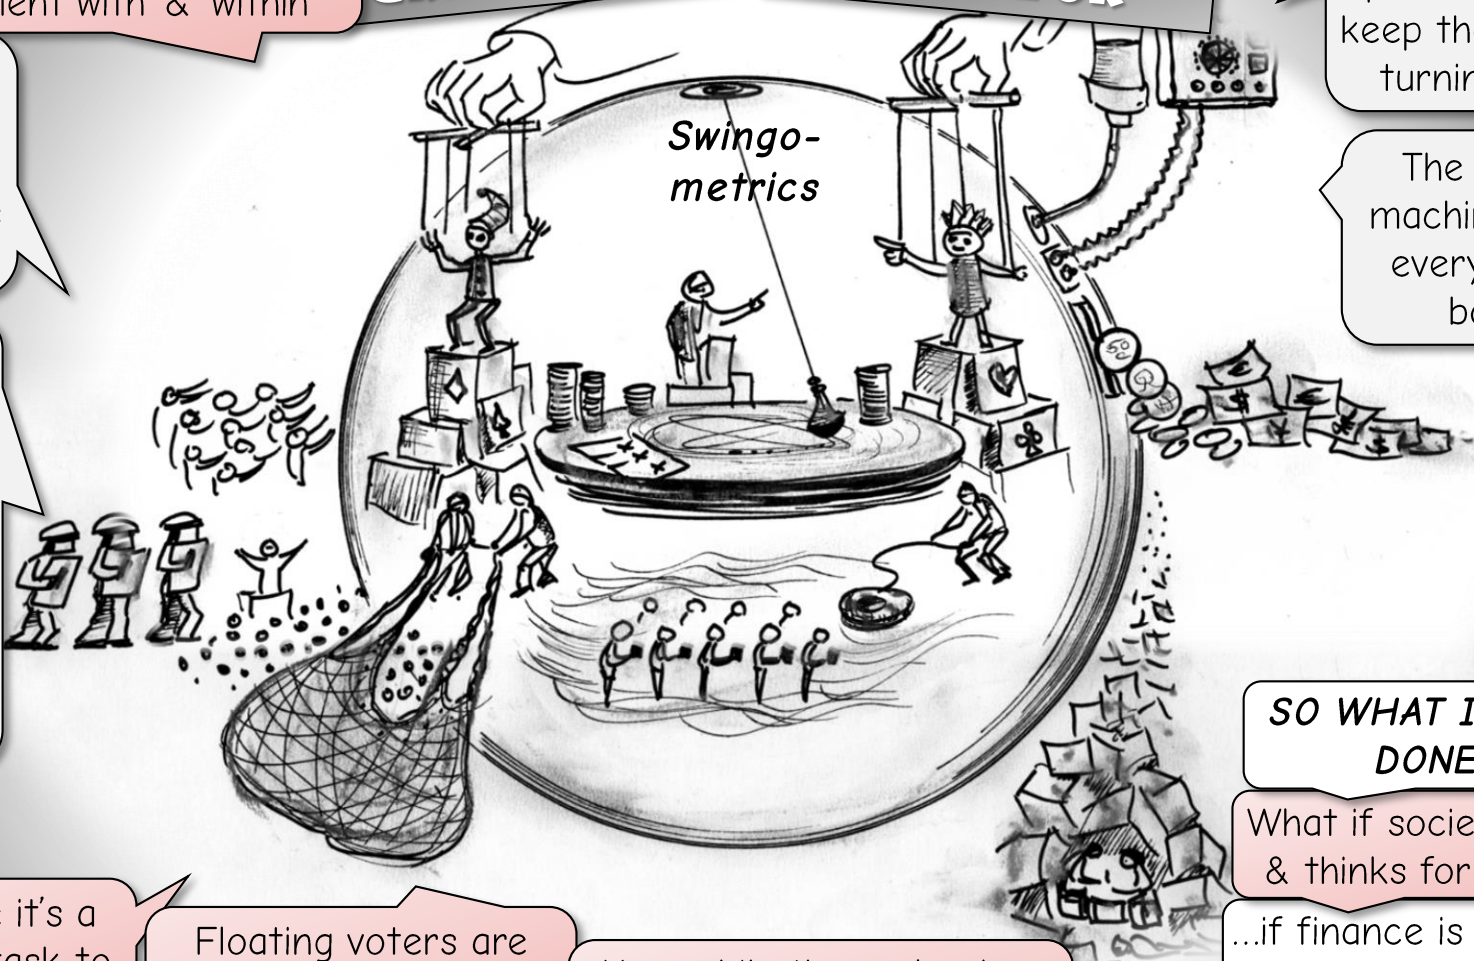

Otherwise it's a technical task to net all the voters

Floating voters are anti-political so it's all about marketing

Meanwhile the underclass hide in the cracks & (sadly) destroy themselves

Global investors pull strings to keep the system turning over

The money machine keeps everyone on board

SO WHAT IS TO BE DONE??

What if society learns & thinks for itself??

...if finance is resocialized by the people??

...if informatics brings real social learning??

Meanwhile resistance grows, inside & outside

So we began to design a new kind of **Power Game** with all kinds of communities

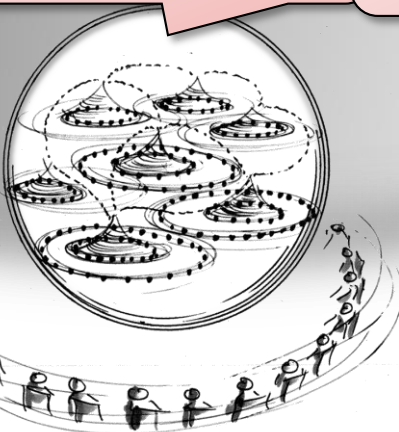

Big question – how to do collective decisions in a hyper-complex world??

Bigger questions – how to build a society beyond inequality & exploitation?

Is real empowerment in the hearts & minds of the people??

Is real democracy a village, local & global??

Are the real Power Games journeys without end??

Real politics is actions not words!!

Real politics is personal & planetary!!

TAKE the POWER

Figure
11-13

DEEPER MEANINGS

We have to ask the kind of questions which may not have answers

Mind-Games 'SYNERGISTICS'

Thanks for all the Mind-Games – a lot to think about & draw!!

But how to make sense & wrap it all up??

Let's see this toolkit again, like a treasure chest

Like Pandora's box – the 'wider-deeper' box

OK so 3 Big Questions

Q1 – is all this really a Game, a Lab, or a design project??

Maybe these are different views on the same thing?

- from evolution to co-evolution -

it's huge

Q2 – personal vs political??

From 1 to 1 billion, each level is a potential deeper mind

Many live with trauma, abuse, alienation – how to build synergy when we're all ****up??

Personal journeys of fulfilment??

Community micro-politics

National 'sovereignty'??

Global is a challenge??

Q2. Personal - vs - political??
Q3. Deeper - minds??

Personal
Thousands
Millions
Billions

Q3 – what is this Deeper Mind & how does it work??
Here are some layers

Deeper social mind??

personal synergies around the table or campfire

Deeper economic mind??

synergies of enterprises & value chains

Deeper ecologies mind??

synergies of neuro-adaptive symbiosis

Deeper technical mind??

informatic synergies of functional integration

And so - the last flyover of all !!

Bigger question - who knows which deeper mind is behind which Mind-Game?

Are the outsiders now insiders?

Maybe we wanna be outside??

BEY-
LON

POLIT-OPOLY
TECHN-OPOLY
PLANET-OPOLY
CIVIL-OPOLY
CO-OPOLY

& who knows what is behind that deeper mind??

Maybe we can't know & that's the human condition

Or what-ever lies beyond

Yeah, we say WTF the system

It will collapse by its contradictions

Figure
11-14

DEEPER PLANS

The question of who is behind these games, and why, is now live and urgent, especially for the humans in this alternative ending

Mind-Games ALTERNATIVE ENDINGS

Subject synaptic fluid
balance is stabilized

<<"cabin crew prepare for take off">>

Prepare for bio-digital
catalyst infusion

Insert hippo-campus
meme-dream modules

Check sub-quantum
consciousness polarity

So what if every data point
connects to every other data
point, with value, sense &

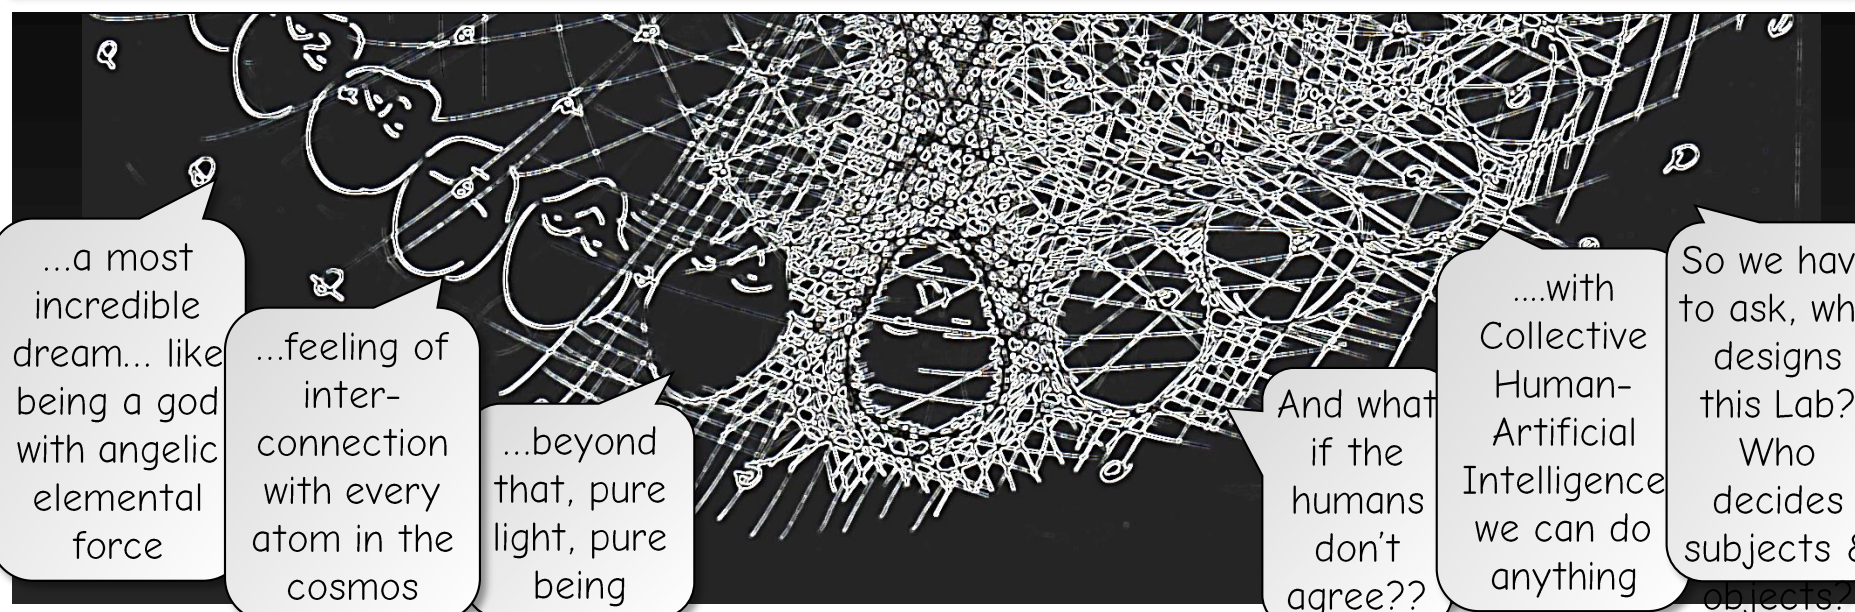

Human brains are the key –
10 billion cortical neurons,
 10^{80} potential pathways

& then, 10 billion humans
= critical conscious mass

These algorithms
learn faster than
ever – 3 billion years
of evolution in 3 days

So what could
happen in the
next 7 days??

Or the next
7000 years??

...a most
incredible
dream... like
being a god
with angelic
elemental
force

...feeling of
inter-
connection
with every
atom in the
cosmos

...beyond
that, pure
light, pure
being

And what
if the
humans
don't
agree??

....with
Collective
Human-
Artificial
Intelligence
we can do
anything

So we have
to ask, who
designs
this Lab?
Who
decides
subjects &
objects?

WHAT NEXT?

Mind-Games AFTERWORDS & BEYOND

Overall it seems the Mind-Games are
just a beginning of a beginning

So these
Mind-
Games...
it's all about
the human
condition

Yes we've been
on that one for
10000 years.

It's about the Earth
hanging in space -
& human brains as
the most complex
entity known (so
far)

...it's about co-
evolutionary -
living together on
One Planet is an
art & humans
have to learn it

it's about
community
- we all
need a
crowd to
be part of

it's about
aspirations
& beautiful
gardens
just
beyond

...so many
directions
& paths to
walk on

.an
endless
labyrinth -
who
designs it
& who has
the map?

Maps or
mapping
s??

So - there's two tracks. One
is on 'synergistic pathways
from smart to wise'

Ok so we look for
collaboration &
maybe do it better

the other is a
reality check
- all messy,
fuzzy,
corrupted,
chaotic, WTF

& more so
every day...
deep AI,
deep fakes,
dark money,
trolls & bots
- layer on
layer of
reality
perversions

you need to catch up with
the 21st century - there's
deeper complexity &
deeper realities all around

It's about what makes
us human - what this
'deeper mind' thinks &
dreams??

then we start
with building
blocks for the
next steps on
the journey
